REFERENCE FOR BB CONSTRUCTION

To whom it may concern,

Our early experiences of BB Construction were on larger commercial projects where they were completing and managing all work on site as a subcontractor to one of the large commercial contractors in the region. In addition we have used BB Construction direct on a number of projects including:-

- complex retrofitting of shop into Commercial Kitchen & Retail facility
- residential alterations including detailed waterproofing of basements for Horizons regional council

I recommend BB Construction for the following reasons:-

- integrity, professionalism & teamwork, they always communicate as part of a team, without confrontation, giving a feeling of confidence to the architect/client
- quality of workmanship, typically one of the business owners is closely involved on site and is keen to ensure all work is done to the highest standard as it reflects directly on the company
- problem solving, they always call with an idea how they can solve a problem or provide a better result, often giving the client added value at no extra cost
- nothing is a problem, if unforeseen or additional scope of work is required, they plan and execute to best trade practice for a fair and reasonable cost
- project management/resourcing, projects are well planned with costs/timeline monitored and communicated with the client
- sub-contractors are well selected and managed throughout the construction process
- competitive pricing, when we go to our preferred contractors for tender pricing BB Construction would always provide a competitive price

BB Construction have worked hard to provide the capacity to complete medium/large projects without the owners losing touch with what is happening on site (which is a problem a number of larger commercial contractors have) As registered architect with over 20 years experience I have found BB Construction one of the best contractors to deal with.

Please do not hesitate to contact me should you have any questions.

Yours sincerely
E3Architects
